Finding the Open Receiver: A Quantitative Geospatial Analysis of Quarterback Decision Making

Frame 5. With this play designed to the offenses' right side of the field (Wayne on the "over" or deep crossing route), Luck looks left to hold off the free safety.

Frame 6. With two receivers maintaining small zones (i.e. "covered"), Luck remains patient, allowing the play to develop.

Frame 7. With Hilton's inside release go-route, he successfully occupies the cornerback responsible for the right one-third of the field.

Frame 8. With the corner staying true to his assignment, Luck observes Wayne's zone starting to open.
